Acknowledgements

The Population Reference Bureau gratefully acknowledges the cooperation and assistance of the International Demographic Data Center and Foreign Demographic Analysis Division of the U.S. Bureau of the Census, the Population Division and Statistical Office of the United Nations, the International Statistics Office of the U.S. National Center for Health Statistics, and the World Bank in the preparation of this year's *Data Sheet*. We also thank Carl Haub and intern David Hotchkiss for their valuable contributions. The PRB assumes responsibility for all figures shown.

General Notes

World Population Data Sheets of various years **should not be used as a time series.** Because every attempt is made to use the most recent and reliable information available, fluctuations from year to year often reflect improved or revised estimates based on new data sources or studies rather than actual changes in levels. This is particularly true of countries in the less developed regions for which statistics are often computed from incomplete data and assumptions derived from demographic models.

Regional and World totals: Population totals include small areas not listed separately; regional data have been independently rounded and may not equal the sum of their parts; regional and world rates and percentages are weighted averages of those countries for
